July 28, 2000

Mr. Peter D. T. Eastwick
Spill-Sorb Canada Inc.
Suite 301, 12204 - 106 Avenue
Edmonton AB T5N 3Z1

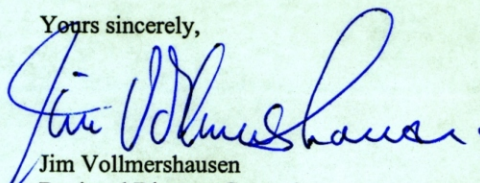

Dear Mr. Eastwick:

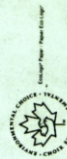

This is further to your company's recent request concerning approval for the use and disposal of Spill-Sorb absorbents.

Environment Canada supports the use of Spill-Sorb absorbent for response to oil spills and recognizes this product as an effective hydrocarbon absorbent. In Canada, the practice of disposing of waste absorbent materials containing hydrocarbons in landfills is acceptable, so far as it is within the regulations posed by the authority having jurisdiction and the landfills are licensed to receive such wastes.

I trust this information is satisfactory. If you should require any further information regarding this matter, please do not hesitate to contact Mr. David Noseworthy. He can be reached at (780) 951-8753.

Yours sincerely,

Jim Vollmershausen
Regional Director General
